

Standards and Network Development (SND) Workgroup Update

National EPHT Conference
April 2005

Nancy Tosta, Ross & Associates, Facilitator for SND

Activities to Date

- Technical Glossary (v 1.0)
- Principles (V 1.0)
- Conceptual Architecture Diagram
- Components and Data Flow Sequences Diagram
- Trading Partner Agreement Template
- Data Access Barriers Survey
- Geo Primer
- Vision Document

Glossary Table of Contents

- Access Rights Server:
- Association/ Correlation:
- Catalog Services:
- CDC UP
- Centralized Processing:
- Core Data - (EPHTN):
- Data Accuracy:
- Data Completeness:
- Data Consistency:
- Data Discovery:
- Data Extraction:
- Data Loading:
- Data Quality:
- Data Release
- Data Sharing
- Data Sharing Agreement:
- Data Timeliness:
- Data Transfer/
- Data Transformation:
- Data Validity:
- Data Warehouse:
- De-identified data:
- Distributed System:
- Integrated Data Repository (EPHT IDR):
- Environmental Public Health Tracking Network (EPHT Network):
- Environmental Public Health Tracking Program (EPHT Program):
- EPA Exchange Network
- EPA Exchange Network Node:
- EPHT Gateway:
- EPHTN Catalog:
- ETL (Extraction, Transformation, and Loading):
- Geocoding:
- Integrated Data:
- Interoperable Systems:
- Linkage/ Link:
- Memorandum of Understanding (MOU):
- Metadata:
- Network Features:
- PHIN:
- Rational Unified Process (RUP):
- Registry:
- Registry Service:
- Repository:
- Stakeholder:
- Trading Partner Agreement (TPA):
- Web Services:

Examples of EPHTN Principles

■ Network Function

- The NEPHTN provides the ability to discover and access environmental data and health data and linked environmental-health data

■ Network Architecture

- Users enable and/or use "gateways" to access and securely provide data resources (e.g., data, tools, methods) via the Internet

■ Standards

- Metadata are required for all data sets available through the NEPHTN

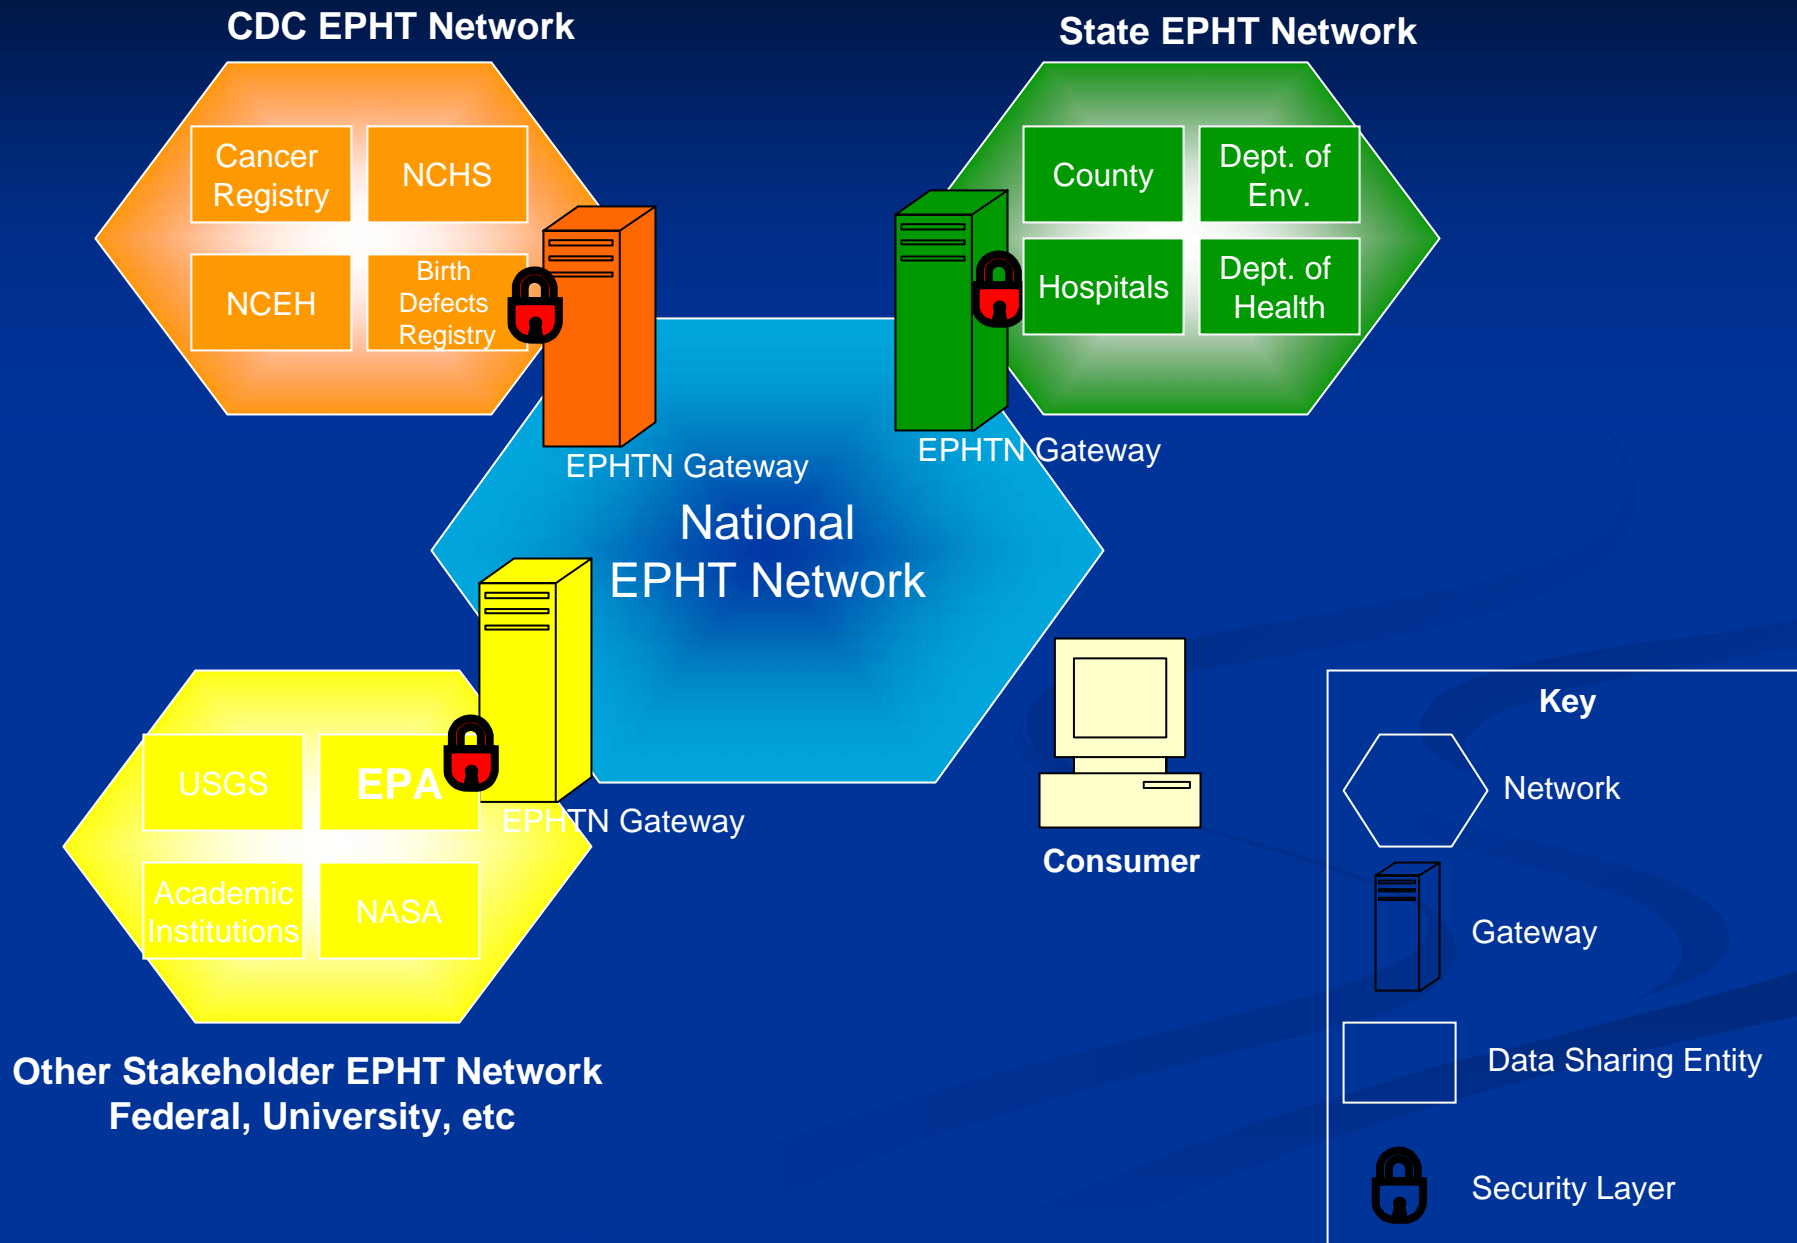

■ Access

- Access to data will be granted by the data provider, with different rights of access possible

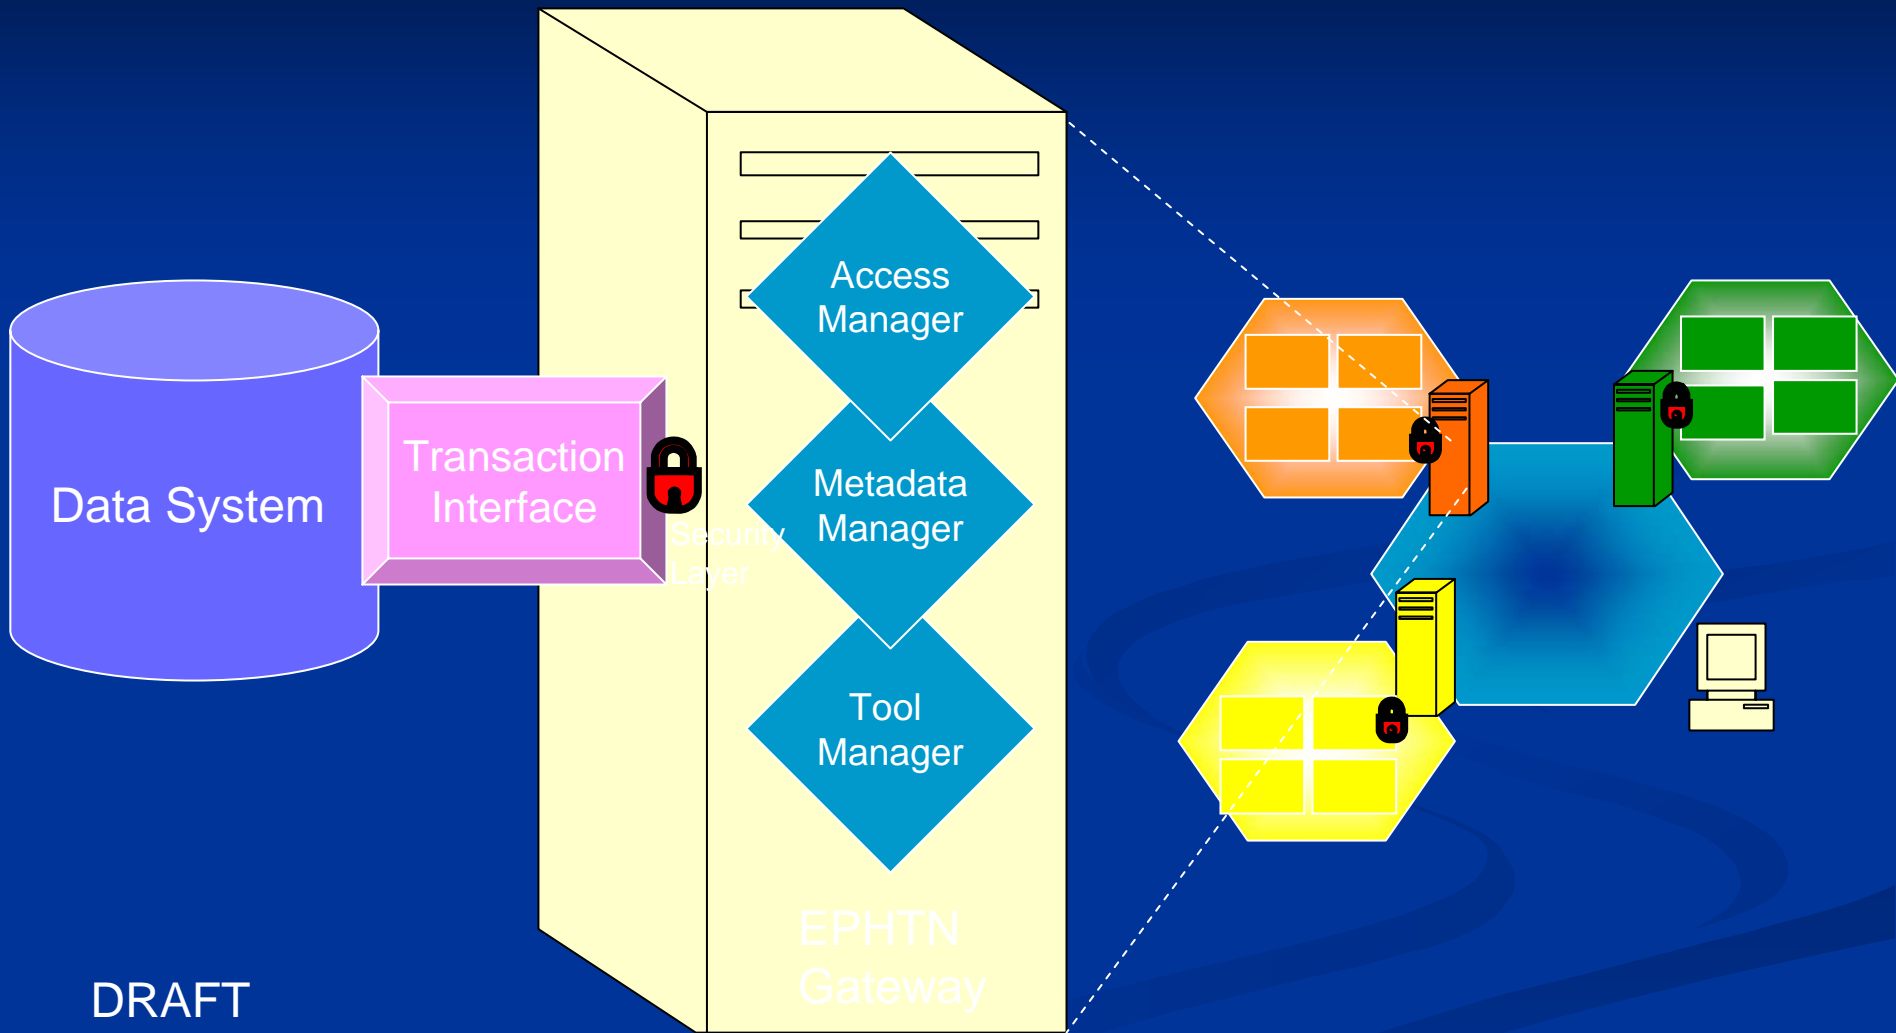

■ Network Management

- There is a "National Coordinating Body" that makes decisions about the NEPHTN

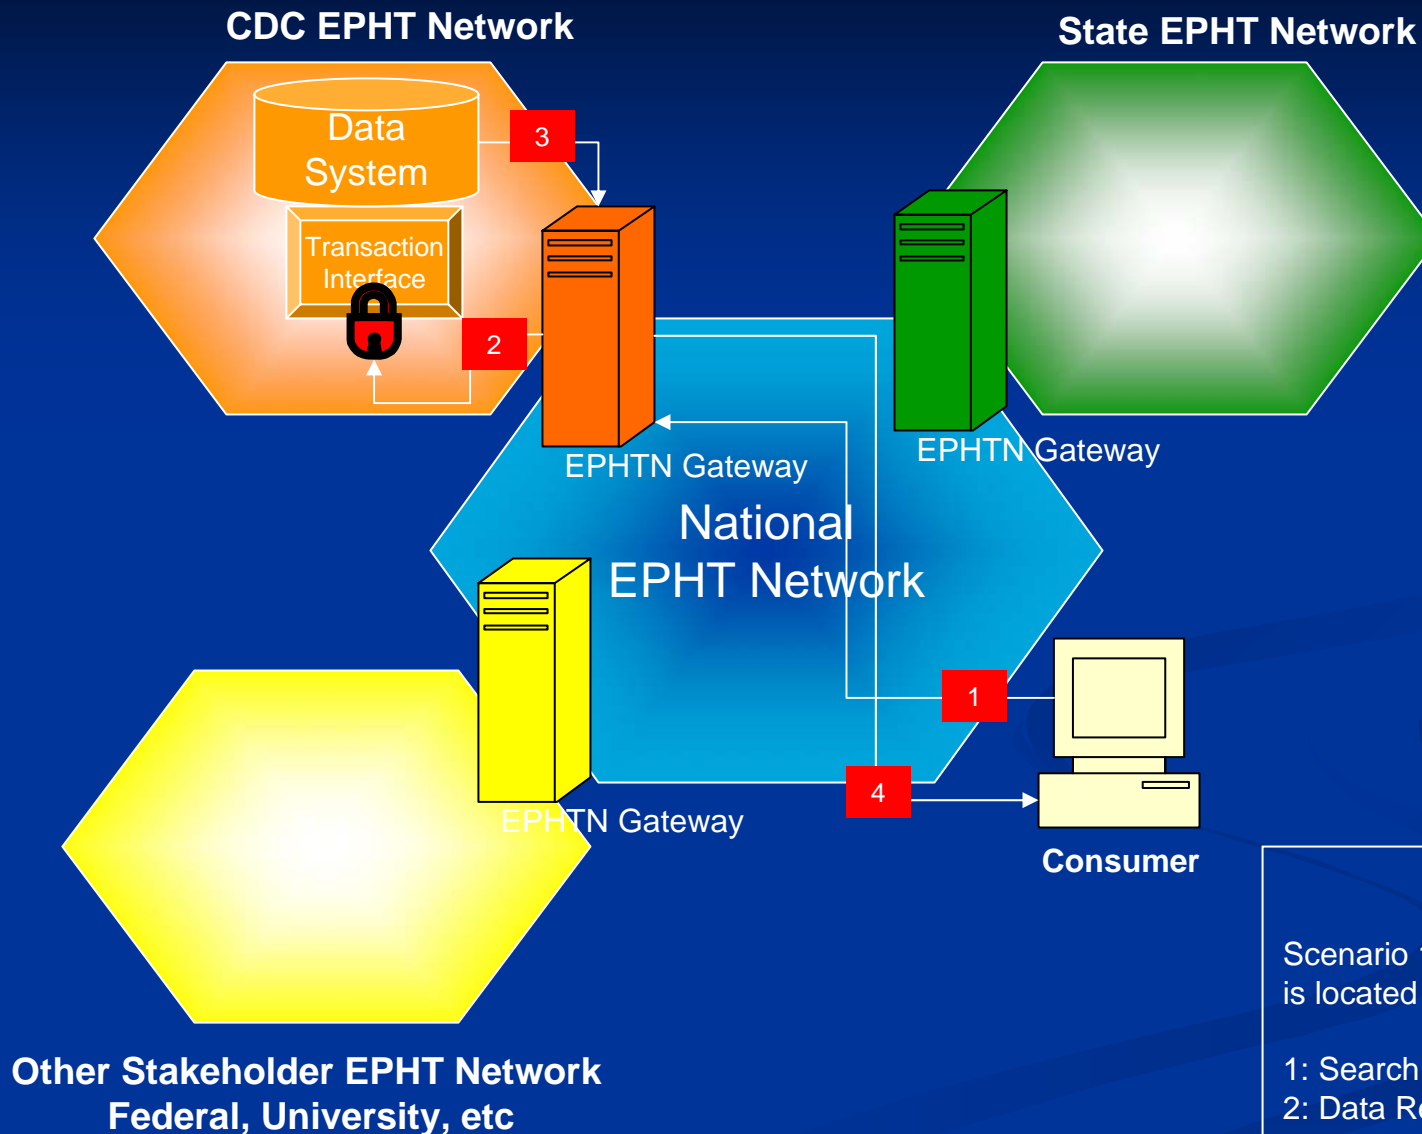

DRAFT High-level Overview of the National EPHT Network and Partner EPHT Networks

Components of an EPHTN Gateway

DRAFT Data Flow Sequence: Scenario 1

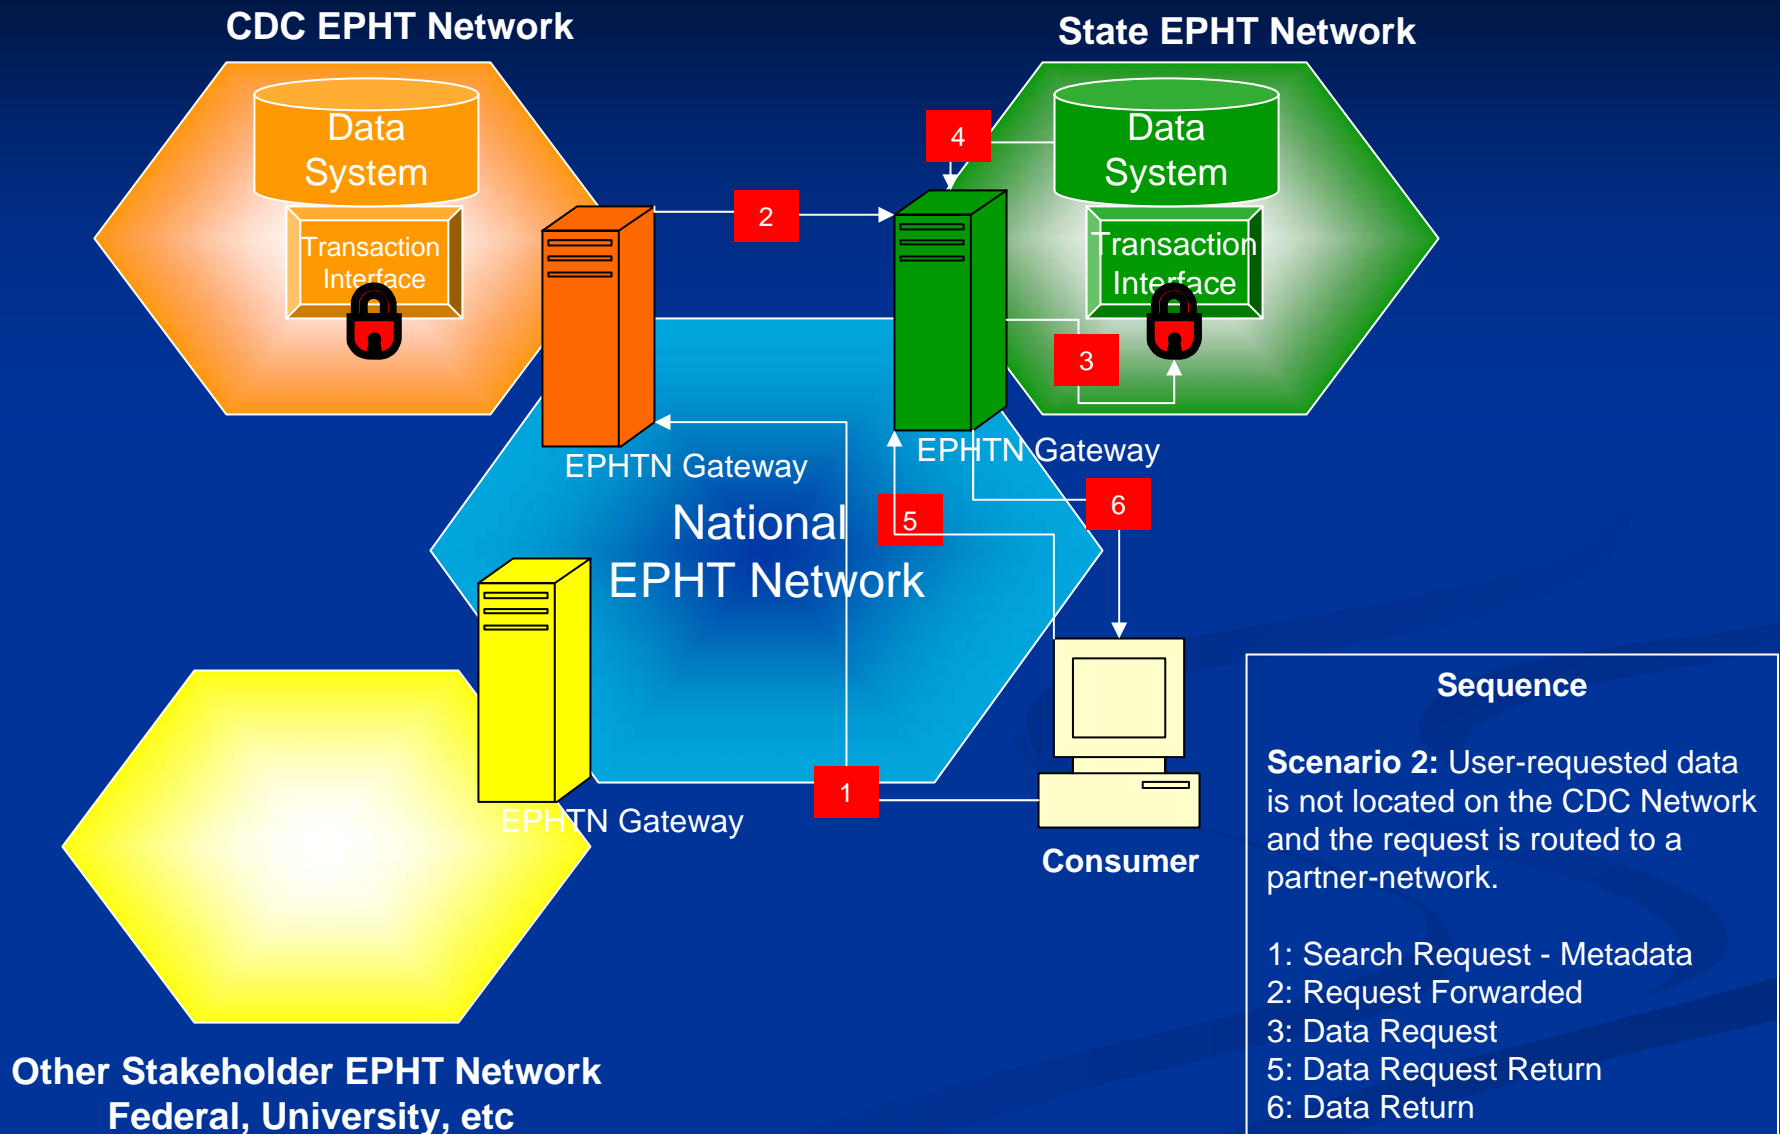

Sequence

Scenario 1: User-requested data is located on the CDC Network.

- 1: Search Request - Metadata
- 2: Data Request
- 3: Data Request Return
- 4: Data Return

DRAFT Data Flow Sequence: Scenario 2

“Trading Partner Agreement” Template

- Introduction
- Data Description
- Data Management
- Data Access/Security
- Contract Management/Administration
- Other
- Signatures

2005 Workplan Current Activities

- Develop a Metadata Template and Identify Tools for Creating Metadata
- Work with CDC/SAIC on EPHT “Prototype” in Joint Application Development (JAD) sessions
- Examine the possibilities of interchanging data between the EPA Exchange Network and PHIN

2005 Workplan Current Activities

- Explore a Conceptual Data Model to facilitate linking data
- Examine EPA Exchange Network – Implementation Lessons Learned
- Examine EPA Data Flows
- Examine EPHT Grantee Data Activities

2005 Workplan Future Activities

- Continue to define requirements for local, state, and national needs for EPHT (prototype and JAD activities)
- Continue Metadata Development Activities
 - Explore requirements for and implementation options for metadata registries
 - Finalize metadata template and collection tools and provide training
 - Explore options for a “Controlled Vocabulary” for EPHT
- Coordinate with PHIN Public Health Information Network (PHIN)
 - Develop better understanding of PHIN, NEDSS, NBS requirements and how EPHT interfaces (May 9th)
 - Participate in the PHIN Analysis, Visualization, and Reporting (AVR) Work Group
 - Explore, adopt, adapt PHIN security protocols

2005 Workplan Future Activities

- Continue to explore means to integrate with EPA Exchange Network
- Refine Network Architecture schematic diagrams
- Develop a “Data Model” for 1-2 specific examples of EPHT Data Linkages
- Explore the need for:
 - Data Quality Standards
 - Locational Referencing Standards
- Coordinate with the Program Marketing and Outreach Workgroup
- Develop an “Executive GeoPrimer” (short)

2005 Workplan Future Activities

- Develop EPHTN “Preliminary Implementation Guidelines”
 - Address technical and institutional approaches
 - Provide “template” for Grantee 120-Day “Master Plan”

Questions?
